

To whom it may concern,

Heyou INC has engaged Scytale AI services to perform an independent and comprehensive security assessment and to review the scope and effectiveness of their security controls.

The objective of this engagement is for Heyou INC to be in compliance with SOC 2 Type II in the next months.

The company will be audited by an external independent audit firm, Decrypt Compliance.

As part of this engagement, we assist Heyou INC in the following aspects:

- Evaluate their information security risks, based on the impact of threats and vulnerabilities; including Penetration test.
- Design a comprehensive suite of information security controls and risk management processes to address information security risks;
- Implement management policies and processes to ensure that the information security controls address the risks on an ongoing basis.

Best Regards,

**Adar Givoni**
